Summary

Backend engineer with Python and PostgreSQL experience building payment systems.

Experience

Backend Engineer

Hyderabad, India

Acme Payments

Jan 2022 – present

- Reduced p99 API latency by 35% by profiling Python services and migrating hot paths to Go, supporting end-to-end ownership of the billing pipeline.
- Built PostgreSQL replication topology serving 5M+ users with 99.97% uptime.
- Containerized services with Docker and deployed via CI/CD pipelines on Agile sprints.

Skills

Languages: Python, Go, SQL

Frameworks: Django, FastAPI

Infrastructure: PostgreSQL, Docker, Kubernetes, AWS
